### ***Delta Epsilon Chi State Conference Activities: As Reported to Bryan Hayes, School of Business***

I thought I would let you know about this past weekend and our success at the Delta Epsilon Chi State Conference in Hattiesburg. Robbie Penton, Bill Cruse and I placed first in Quiz Bowl, winning each of three rounds pretty handily. Bill and Robby also competed in Sports and Entertainment Marketing and placed 4th scoring a 93 on their case study (there was a one point difference between 1st-4th). Jenny Tate and Catherine Jenkins won 1st place in Business Ethics with a perfect score of 100 on their case study. So out of four events that Mississippi College entered, we placed in the top 5 in three and won two of them. I'd say that was a pretty good first showing. I was also elected to serve as the 2004-2005 State

Vice President, so I am very proud of that honor. We will now compete at the International Delta Epsilon Chi Conference in Nashville April 14-18. Just figured I'd let you know, and I plan to come by and see each of you in the next couple of days. Thanks for your support. From: Shawn Harris

***Fraud Alert: Protect yourself:***

***This Just in From the Internet:***

An unnamed corporate attorney sent the following out to the employees in his company:

1. The next time you order checks have only your initials (instead of first name) and last name put on them. If someone takes your checkbook they will not know if you sign your checks with just your initials or your first name but your bank will know how you sign your checks.
2. When you are writing checks to pay on your credit

card accounts, DO NOT put the complete account number on the "For" line. Instead, just put the last four numbers. The credit card company knows the rest of the number and anyone who might be handling your check as it passes through all the check processing channels won't have access to it.

3. Put your work phone # on your checks instead of your home phone. If you have a PO Box use that instead of your home address. If you do not have a PO Box, use your work address. Never have your SS# printed on your checks. (DUH!) You can add it if it is necessary. But if you have it printed, anyone can get it.
4. Place the contents of your wallet on a photocopy machine, do both sides of each license, credit card, etc. You will know what you had in your wallet and all of the account numbers and phone numbers to call and cancel. Keep the photocopy in a safe place. I also carry a photocopy of my passport when I travel either here or abroad. We've all heard horror stories about fraud that's committed on us in stealing a name, address, Social Security number, credit cards, etc. Unfortunately I, an attorney, have firsthand knowledge because my wallet was stolen last month. Within a week, the thief(s) ordered an expensive monthly cell phone package, applied for a VISA credit card, had a credit line approved to buy a Gateway computer, received a PIN number from DMV to change my driving record information online, and more.

But here's some critical information to limit the damage in case this happens to you or someone you know: 1. We have been told we should cancel our credit cards immediately. But the key is having the toll free numbers and your card numbers handy so you know whom to call. Keep those where you can find them

2. File a police report immediately in the jurisdiction where it was stolen, this proves to credit providers you were diligent, and is a first step toward an investigation (if there ever is one). But here's what is perhaps most important: (I never even thought to do this).

3. Call the three national credit reporting organizations immediately to place a fraud alert on your name and Social Security number. I had never heard of doing that until advised by a bank that called to tell me an application for credit was made over the Internet in my name. The alert means any company that checks your credit knows your information was stolen and they have to contact you by phone to authorize new credit. By the time I was advised to do this, almost two weeks after the theft, all the damage had been done.

There are records of all the credit checks initiated by the thieves' purchases, none of which I knew about before placing the alert. Since then, no additional damage has been done, and the thieves threw my wallet away this weekend (someone turned it in). It seems to have stopped them in their tracks.
