Instructions: The Biology, Chemistry and Physics listed in the table are freshman level course sequences. Most students will have taken year long courses in semesters, therefore fill out course 1 and 2, and leave course 3 blank. If a student has taken a year of coursework in quarters, then fill out course 1, 2 and 3. Some institutions have separate grades for lecture and lab. If a science course has a grade for lecture and lab combined, then put grade in for lecture and leave the lab cell blank.
