

For students who are BIOLOGY majors:

The Biology Department has a set of core classes that all Biology majors must take, regardless if they major in General Biology or Pre-med. Several of these courses are prerequisites to Sophomore level classes, so need to be taken before your second year. Lecture courses and lab courses are co-requisites and must be registered at the same time.

The following schedule represents what a **“TYPICAL”** Freshman Biology Major might take.

BIO	111	Biology I Lecture AND Lab	4 hours
CHE	141	General Chemistry I Lecture AND Lab	4 hours
ENG	101	English Composition	3 hours
BIB	110	Old Testament Survey*	3 hours
HIS	211	US History (OR 101: Western Civ. OR 103: World Civ.)*	<u>3 hours</u>
			17 hours

You may have AP credit, dual enrollment, or transfer hours that would change this “typical” schedule. You may be on a varsity sports team or in the choir and may need to adjust this schedule. The truth is that no one is typical, but this schedule is a good place to start. When you meet with your advisor to register, be sure to tell him/her about your specific set of circumstances so you end up with YOUR schedule and not just a typical schedule.

*Other core courses may be substituted.

Chapel: Freshmen are required to take a total of 4 semesters of chapel. Freshmen are automatically enrolled in Freshman Chapel/Blue & Gold 101 for their first Fall semester.
